

WHAT'S INSIDE AN EGG?

LOOK CLOSELY AT THE PARTS OF A CHICKEN EGG

SHELL

The hard outer covering that protects the egg.

MEMBRANE

A thin protective layer just inside the shell.

EGG WHITE

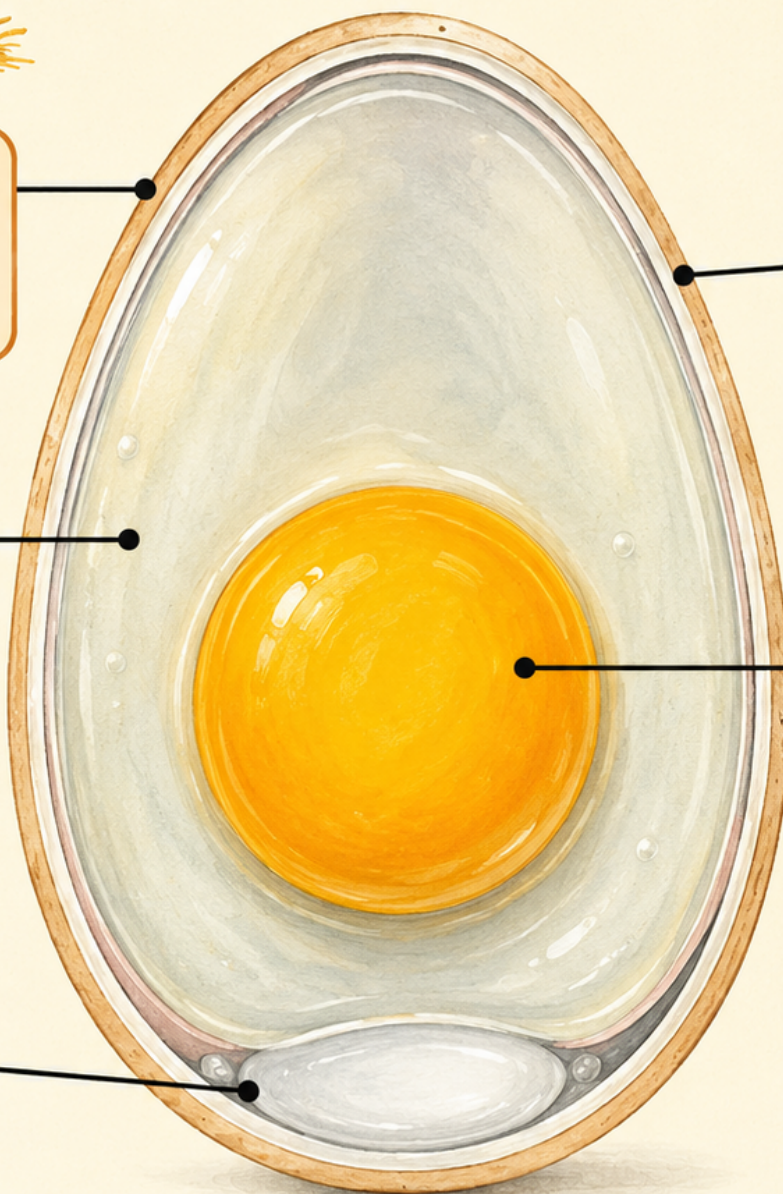

Also called albumen. It surrounds and cushions the yolk.

YOLK

The yellow center that stores nutrients.

AIR CELL

A small pocket of air at the wide end of the egg.

DID YOU KNOW?

An egg has several layers that work together to protect what is inside.

Point to each part. Which part is on the outside? Which part is in the center?
